Federal Communications Commission
 Office of the Secretary

Dear Chairman Martin:

On behalf of the U.S.-Mexico Chamber of Commerce, I applaud the Federal Communications Commission for its leadership in ending cable monopolies in multiple dwelling units. With your leadership, the FCC has once again stood up for the free market system and supported the rights of the consumer to have access to every available option in price, service and quality.

For too long, those who live in apartments, condominiums or other private developments have been denied the benefits of video competition because some incumbent cable companies were able to negotiate exclusive access agreements. These agreements were designed to protect the service providers from competition, not to represent the best interests of the consumer. The FCC decision will break that unhealthy pattern, give consumers choice and open the floodgates for the further deployment of broadband networks.

As you may know, the U.S.-Mexico Chamber of Commerce is a leading business organization working to build mutually beneficial trade and investment relationships in the Americas. We support open competition and the expansion of opportunities like this one in which monopolies are destroyed and consumers are offered the choice of affordable and accessible telecommunications service.

Congratulations on your efforts and thank you for your leadership in this important decision.

Sincerely,

 Albert Zapanta
 President & CEO
